

Expert PLM

Data Migration

More than a decade of successful migrations have given us the experience to conduct them predictably and efficiently, ensuring that your critical product data is moved to a new PLM system with maximum quality and usability.

- Extensive experience with data migration
- Tools for profiling data and executing migrations
- Tiered service options based on migration support needs
- Products & training available for customer-led migrations

Key Highlights

- Extensive experience with data migration
- Identify issues early
- Load as much data as possible
- Load with target system software
- Validate early, validate often

Choose migration options that work for you

Birlasoft offers entire migration delivery or the choice of phases where support is needed most.

Evaluation

We recommend a migration strategy based on project scope, migration requirements, risks, and assumptions

Assessment

Extraction - Data extraction process defined and executed
Analysis - Source data examined, data transformations defined
Profile - Missing, conflicting, inconsistent data identified by Birlasoft Profiler
Proof of Concept - Sample dataset migrated, issues identified and resolved

Execution

Migration - After multiple rehearsals, data is migrated to target system.
Validation - Completeness, correctness and usability of migrated data verified

Post Migration

Birlasoft remains on-call to investigate issues and determine resolutions, with the option of complete Application Managed Service support.

CAD Source System

(Including but not limited to)

File System	MatrixOne
Windchill	PDMWorks
Pro/INTRALINK	ProductCenter
Teamcenter	PDMLink
SmarTeam	Home-Grown Systems

Data Types

(Including but not limited to)

CAD	Non-CAD
CATIA	Parts
SolidWorks	Bills of Materials
AutoCAD	Change Data
Creo Elements/Pro	MS Office
NX (Unigraphics)	Viewables
Inventor	...and many more
